Deny Rianto

Semarang, Indonesia | +62 896-6481-8032 | denyrianto@outlook.com | linkedin.com/in/denyrianto | github.com/denyryn | portfolio.rianto.site

Professional Summary

Fullstack Engineer with 2 years of hands-on experience shipping production web and mobile applications. Skilled in API design, database modeling, containerized deployment, and CI/CD automation. Proven remote collaborator with strong cross-functional communication skills. Passionate about clean architecture, performant systems, and end-to-end product ownership.

Technical Skills

Languages: Go, Java, PHP, JavaScript, TypeScript, SQL

Frontend: Nuxt.js, Tailwind CSS, Bootstrap, JQuery, Next.js, React, Inertia.js, HTML5, CSS3

Backend: Laravel, Java Spring Boot, Node.js, Express.js, REST API Design

Databases: PostgreSQL, Redis, MySQL

DevOps: Docker, CI/CD, Coolify, Dokploy, Vercel, Linux Server Administration

Tools: Git, Opencode, Claude Code

Other: Agile/Scrum, Technical Documentation, Team Collaboration

Experience

Fullstack Engineer & Lead of IT Aug 2026 – Present
ID Career *Semarang, Indonesia*

- Leading the IT function for a national competition system, collaborating with external vendors for API integration
- Built an E2E fullstack project with Laravel, Inertia.js, and React, owning fullstack development end-to-end
- Boosted legacy application performance by 90% across frontend and backend
- Technologies: Laravel, Inertia.js, React, Git

Hybrid Fullstack Engineer Sept 2025 – Present
Azura Labs *Semarang, Indonesia*

- Built a high-traffic national competition platform as DevOps and Fullstack Engineer — Go backend, Nuxt.js + Tailwind CSS frontend, PostgreSQL, containerized with Docker, delivered ahead of schedule
- Contributed 35% of development on a government ministry project using Java Spring Boot with JQuery and Bootstrap
- Developed a hospital feature integrating with Satusehat (Indonesia's national health platform) using Laravel with JQuery and Bootstrap, coordinating with hospital IT teams
- Technologies: Go, Nuxt.js, Tailwind CSS, PostgreSQL, Docker, Java Spring Boot, JQuery, Bootstrap, Laravel

Remote Mobile Developer Apr 2025 – Jun 2025
PT. Muri Digital Grup Internasional *Remote*

- Developed a cross-platform mobile application using React Native and Expo, integrating REST APIs for seamless data flow
- Operated within an Agile team, contributing to sprint planning, daily stand-ups, and iterative delivery
- Technologies: React Native, Expo, Redux, Git

Projects

Katresna Creations – Digital Service Platform Mar 2025 – Present
Product Engineer

- Engineered a full-stack digital service platform with Next.js, Strapi CMS, and PostgreSQL on S3-compatible object storage
- Implemented server-side rendering and SEO optimization for improved performance and discoverability
- Automated CI/CD pipelines via Coolify on self-hosted Docker infrastructure with reverse proxy
- Collaborated with UI/UX designers to deliver a responsive experience
- Technologies: Next.js, Strapi, PostgreSQL, Minio, Docker, Coolify, Git

Education

Diploma 4 (D4), Computer Engineering Technology 2022 – 2026
Semarang State Polytechnic *GPA: 3.88 / 4.00*

Relevant Coursework

Data Structures, Database Design, Web Programming, Web Frameworks, Mobile Programming, Big Data, Machine Learning

Certifications
