

BUILT. SHIPPED.

Fullstack engineer in Semarang, Indonesia. Two years shipping web and mobile products end to end. Schema, API, container, deploy.

NEXT

Katresna Creations

A digital service platform built end to end: Strapi content, Next.js SSR for search visibility, PostgreSQL, S3-compatible media. Ships through a self-hosted pipeline behind a Docker reverse proxy — the unglamorous infrastructure that keeps a small product online.

Product Engineer · Katresna · 2025–Present · katresna.web.id

GO

National Competition Platform

Go services, a Nuxt and Tailwind interface, PostgreSQL, and Docker deploys. Delivered ahead of schedule, with external vendor APIs integrated end to end. Two vendors, one contract, no excuses in the retro.

Fullstack & DevOps · Azura Labs · 2025–Present

INERTIA

National Competition System

Sole developer on a national competition system: Laravel, Inertia.js, and React — 90% complete in the first week, vendor APIs wired in end to end. Frontend and backend work cut overall app speed by 90%.

Hybrid Fullstack Engineer & IT Lead · ID Career · Sept 2026 – Present

JAVA

Ministry Portal — Maintenance & Features

Sole bugfix owner through the maintenance window, then 35% of feature delivery. Java Spring Boot, jQuery, Bootstrap. Maintenance teaches what the original author meant, not what he wrote.

Fullstack Engineer · Azura Labs · 2025–Present

LARAVEL

SatuSehat Hospital Integration

A hospital feature wired into Indonesia's national health platform. Laravel, jQuery, Bootstrap. The integration was the work; the screen was the easy part.

Fullstack Engineer · Azura Labs · 2025–Present

EXPO

Cross-Platform Mobile App

A cross-platform mobile app in React Native and Expo, delivered in sprint cycles within a remote Agile team. Held the API contract and data flow with backend engineers.

Mobile Developer Intern · PT. Muri Digital Grup Internasional · 2025

ABOUT

Deny Rianto builds systems end to end — schema and API through container and reverse proxy. Two years of production work across a national competition platform, a ministry portal, and a hospital integration with Indonesia's national health data platform. Go, Laravel, Nuxt. AI coding agents draft roughly 80% of the code. He directs, reviews, integrates, and owns what ships.

Deny Rianto · fullstack engineer · Semarang, ID

STACK

Six languages. One deployment habit.

Ordered by use: CORE first, FAMILIAR last.

CORE	Go · Nuxt.js · Docker · Tailwind CSS · Laravel · Opencode · CI/CD
WORKING	Java Spring Boot · React · jQuery · Bootstrap · Git · Linux server administration · PostgreSQL · MySQL
FAMILIAR	TypeScript · Next.js · Express.js · Nest.js · Inertia.js · Redis · Dokploy · Coolify

THE RECORD

Roles, newest first.

Hybrid Fullstack Engineer & IT Lead

Sept 2026 – Present

ID Career

National competition system built on Laravel, Inertia.js, and React — 90% of the build in the first week, vendor APIs integrated alongside. As sole developer, frontend and backend work cut overall app speed by 90%.

Laravel · Inertia.js · React · REST API integration · Git

Hybrid Fullstack Engineer

Sept 2025 – Present

Azura Labs

Three engagements: national competition platform in Go and Nuxt, ministry project in Spring Boot, SatuSehat integration in Laravel. As project engineer lead, reviews others' code while shipping his own and takes over in-flight features.

Go · Nuxt.js · Tailwind CSS · PostgreSQL · Docker · Java Spring Boot · jQuery · Bootstrap · Laravel

Remote Mobile Developer Intern

Apr – Jun 2025

PT. Muri Digital Grup Internasional

Cross-platform mobile delivery in a remote Agile team — sprint planning, daily stand-ups, and a shared API contract with the backend. Practiced cross-team communication and progress reporting.

React Native · Expo · Redux · Git

Earlier: curriculum content developer at Semarang State Polytechnic, writing WordPress and WooCommerce course modules (Oct – Dec 2024).

PAPER TRAIL

Education, GPA, five certifications.

D4, Computer Engineering Technology

Semarang State Polytechnic · 2022–2026

GPA 3.88 / 4.00

TOEIC — 815	ETS · Jul 2026
Frontend Developer (React)	HackerRank · Jun 2025
Problem Solving (Basic)	HackerRank · Jun 2025
Oracle Database Programming SQL	Oracle Academy · Jul 2023
Oracle Database Design	Oracle Academy · May 2023
